Google's PageRank Implementation

Guide : Jignesh Bhatt(IITV)

- In this project we implemented small a scale version of Google's Pagerank Algorithm. The main aim was to rank interlinked webpages for given one or multiple words query and to sort the pages according to relevance with given query. This project was implemented in PHP, Octave and using phpMyadmin database tool.

3-D reconstruction based on Stereo Vision

Guide : Gautam Dutta(DAICT)

- The project is based on Stereo Vision. The aim was to extract 3D information of scene points from a given pair of stereo images. To find out depth of each scene point we dealt with Rectification and Correspondence problem. We calculated depth map of stereo images and relative distances of objects in the image.

Internship

Optical Character Recognition for Aadhaar-Card

ATOS India

May-July 2016

- In this project we created OCR services to extract the meaningful data from scan image of Aadhaar-Card. Accuracy of extract data almost 80-80%. The meaningful like Name, Date of birth, Aadhaar-Card No., Address, etc. In this project we used opencv for image processing and python-tesseract library for text extraction.
